

600 Series

.670"

- The 600 series or Ultra Lift[®] is a hybrid balance for both tilt or non-tilt applications.
- Balances are ordered base on stamp or sash length and weight.
- When properly installed the 600 series will lift 70% of the sash weight, making the Ultra Lift a class 5 balance
- Getting precise measurements is crucial, because each balance is custom made and tensioned to fit a given sash length and weight.
- It comes in a gray or white tube and is the optimal balance for your heavier windows—Residential or Commercial.
- The balances achieve their exceptional performance by combining the best quality of torsion spring, extension spring and spiral rod technology.
- The following chart is an example of how to create WRS part numbers for ordering. The last entry is an example of the white tube option.

Balance Length	Sash Weight	Stamp	WRS Part #
10"	15	10-15	01-60010-15
11"	11	11-11	01-60011-11
12"	18	12-18	01-60012-18-W

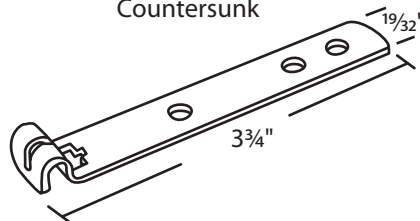

Lower Sash
(Single/Double Hung)
Sash Height 42"
Sash Weight 79 lbs

Tilt	Non-Tilt
01-60043-79 43"	01-60044-79 44"

Upper Sash
(Double Hung)
Sash Height 42"
Sash Weight 79 lbs

Tilt	Non-Tilt

Turbo II™ Series

- The Turbo II™ Series is a hybrid balances for both **tilt and non-tilt** applications.
- Balances are ordered base on stamp or sash length and weight.
- When properly installed, the Turbo II™ series balance will lift 70% of the sash weight.
- AAMA honored the Turbo II™ as a class 5 balance; making it a solution for heavy sashes up to 100 lbs and in tandem applications sashes up to 200 lbs.
- The stainless steel nut and rod extension make it less likely to break during installation and increases the overall strength throughout its lifetime.
- Getting precise measurements is crucial, because each balance is custom made and tensioned to fit a given sash length and weight.

850 Series

- The 850 Series® or MegaLift is a hybrid balance for both tilt and non-tilt applications that can make it easier to lift heavy sashes with a weight ranging 100 to 130 lbs.
- Balances are ordered base on stamp or balance length and sash weight.
- If you are upgrading to the 850 Series, measure the sash length and get the sash weight. *Getting precise measurements is crucial*
- Each balance is custom made and tensioned to fit a given sash weight for optimal performance.
- This is an option, in some window designs, that takes the place of tandem pairs of the 600 Series balances.

Balance Length	Sash Weight	Stamp	WRS Part #
